Disclaimer

The sample libraries we sell involve the tasks of recording, sampling, editing and scripting their content. In many of our libraries we include a dedicated job to get a custom sound design result over the sampled source. In some of our libraries we use to sample synth patches that are public domain and freely available throughout the net. In those cases we expressly remark that we don't commercialize those patch files as you can found around, what we sell is a finished sample library that may include some of those patches to feed the sound source. We do a meticulous research not to include commercial patches that may be found online.
